TECHNICAL WRITING COURSE

The English Department

Chapter: 7 & 10

1st Project: Instruction Manual and Web Design

ACADEMIC YEAR 2026
TECHNICAL WRITING FOR SUCCESS
Darlene Smith-Worthington & Sue Jefferson

PERSONAL WEB PORTFOLIO PLANNING & DESIGN WORKSHEET

Student A's name: Yasmine Elsayed **Student B's name**: Nadim Tantawy

PART 1 — Your Target User

1- Who is your primary visitor?

Professor

2- What does this person want to see in 10 seconds?

My academic focus, evidence of proper thinking, and proper terminology

3- What would confuse or frustrate them?

Vague project descriptions, no explanation, too much design and too little context

---

PART 2 — Purpose & Homepage Message

4- One-Sentence Purpose of My Portfolio

"This portfolio supports academic evaluation by providing documented proof of work completed in AI coursework."

5- Homepage Slogan (Short & Clear)

AI Student focused on ML and research-oriented projects

6- First 50 Words (Scannable Intro Paragraph)

Write a short paragraph with keywords early:

I am a senior AI student specializing in machine learning and computer vision. My work focuses on designing, implementing, and evaluating ML systems including neural network architectures, data preprocessing pipelines, and model performance analysis with emphasis on theoretical grounding and reproducible experimentation.

PART 3 — Site Structure (Information Architecture)

7- List Your Main Pages

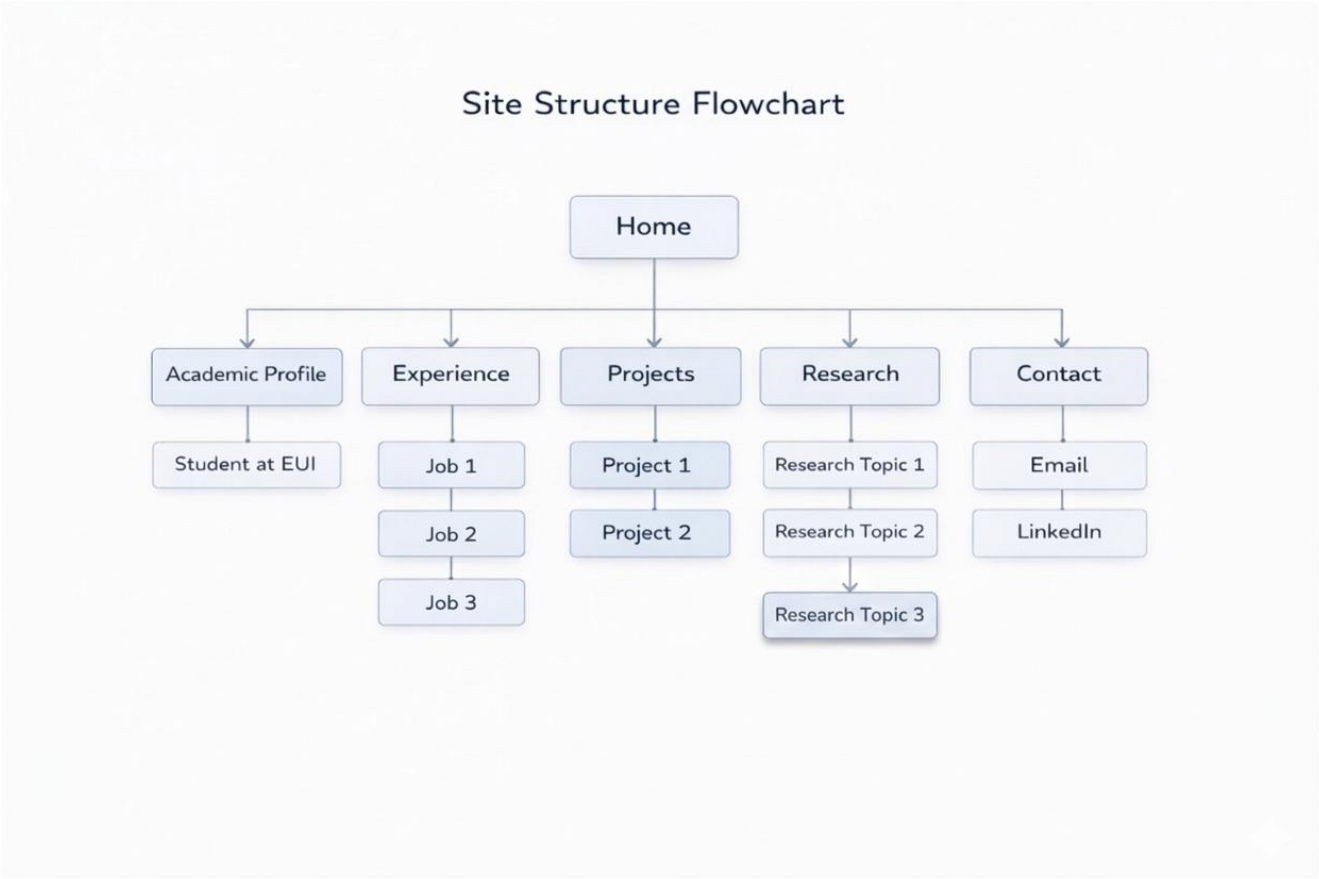
1. **Home**
2. About (academic background)
3. Experience
4. Projects

5. Research
6. Contact / Resume

8- FLOWCHART AREA

Draw your site structure here:

(Home → About → Projects → Contact etc.)

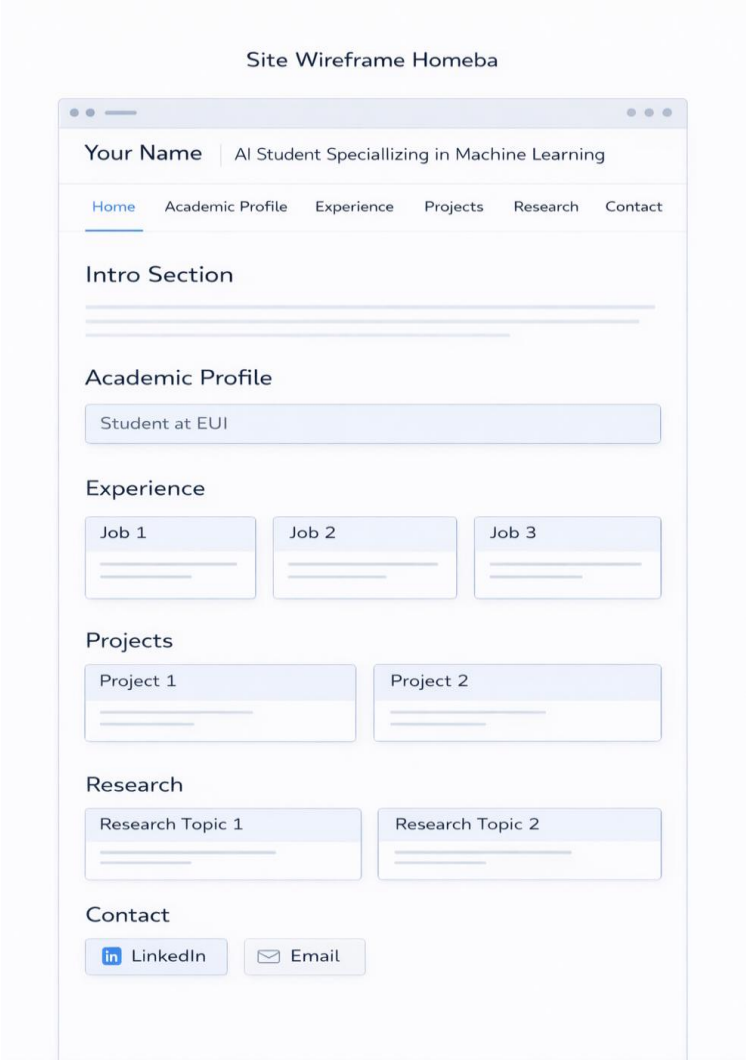


PART 4 — Homepage Wireframe (Layout Sketch)

Sketch your homepage layout below.

Include:

- Header (Name + Role)
- Navigation Menu
- Intro Section
- Projects Section
- Contact Section



PART 5 — Navigation & Usability Check

Answer:

✔ Can users return home easily?
yes

✔ Can they reach important content in ≤4 clicks?
yes

✔ Is your layout uncluttered?
yes

Part 6: Performance & Responsiveness Plan

How will you ensure:

- Fast loading?Use lightweight HTML/CSS structure
- Mobile-friendly layout? Use responsive containers, flexible grid layouts, and a navigation menu

---

PART 7 — Accessibility & Global Awareness

✔ Will you add alt text for images? yes
✔ Is your font readable? yes
✔ Are colors high contrast? yes

One accessibility consideration:

Use semantic HTML elements and clear section headings so screen readers can easily navigate the site.

PART 8 — Creativity & Differentiation

What makes your portfolio unique?

My portfolio focuses on academic machine learning work and research projects rather than just general programming. It includes structured explanations of projects, research topics, and technical experience to demonstrate both theoretical understanding and practical implementation.

What visual style will you use?

☐ Minimalist
☐ Dark mode
☐ Grid layout
☐ One-page scroll
☐ Card-based
☐ Other: **ALL OF THEM**

PART 9 — Tools & Technologies

What tools did you use to create your portfolio?

HTML5
CSS3

JavaScript

· FINAL SELF-CHECK

In 10 seconds, does my homepage:

☐ Clearly show who I am YES
☐ Clearly show what I do YES
☐ Clearly show where to click next YES
